Technical Skills

Languages: C/C++, JavaScript, TypeScript, Python, Java, SQL, HTML, CSS

Frameworks & Libraries: ReactJS, Redux, Node.js, Express.js, Tailwind CSS, Bootstrap, Material UI, FastAPI, Flask

Cloud / Databases / Tech Stack: MongoDB, MySQL, PostgreSQL, Firebase, Git

Experience

Banyan Cloud — Cloud Security SaaS [🔗](#)

May 2025 – Present

Software Engineer

Bangalore

- Collaborated with backend, UX, and product stakeholders to **define API standards** and align on design patterns, independently shipping production features on a **React + TypeScript** codebase.
- Refactored and optimized `@banyan_cloud/roots`, an **open-source NPM component library**, reducing package size by **35%** and improving performance across multiple projects.
- Built interactive **graph visualizations** and drag-and-drop dashboards using React Flow, Mapbox GL JS, and react-grid-layout, with **CI/CD quality gates using ESLint, Jest, and automated build checks**.
- Improved app performance using **Vite** for code-splitting and fast builds, **React Query** for server-state caching, and **Zustand** for lightweight client state, reducing unnecessary re-renders and cutting redundant API calls.
- Integrated **Auth0 authentication** flows in Python (FastAPI) including JWT validation, RBAC, and organization-level access control for cloud security APIs.

PeerBrains Technologies [🔗](#)

December 2024 – May 2025

Full Stack Developer Intern

Bangalore

- Developed `Sync Music Lab`, a **responsive web application** using ReactJS, Tailwind CSS, and Bootstrap, contributing to **\$3 million in revenue within one month**.
- Collaborated with a team of 4 developers to implement a **RESTful API** using Node.js and Express, ensuring seamless data flow between the frontend and backend.
- Accomplished secure user authentication and seamless payment processing by implementing **JWT authentication** and **Stripe**, leading to enhanced data security and a 30% increase in successful transactions.
- Participated in **code reviews** and followed **Agile methodologies**, improving code quality and development efficiency.

NGX Technologies [🔗](#)

March 2024 – November 2024

UI Developer Intern

Bangalore

- Developed the `XPOS Dashboard`, a web application for managing XPOS billing machines, **used by 1,000+ hotel businesses**, improving billing efficiency by 40%.
- Accomplished a 35% reduction in page load times by implementing **React Router** for efficient navigation and **lazy loading** for optimized resource loading, leading to a faster and smoother user experience.
- Built and maintained **reusable UI components** using React TypeScript and Mantine UI, ensuring consistency, scalability, and improved development efficiency.

Education

Master of Computer Applications

2023 – 2024

Global Institute of Management Sciences, Bangalore University

Bangalore

Bachelor of Computer Applications

2019 – 2022

Bhandarkars Arts and Science College, Mangalore University

Udupi

Selected Projects

ShopEase Ecommerce [🔗](#)

2024 – 2025

- Developed a full-stack ecommerce website with JWT authentication, React Router for navigation, and **PayPal integration for secure payments**.
- Accomplished a 20% overall performance boost by **optimizing media loading** with Cloudinary, reducing load times by 65%, and improving client-side state management using **Redux Toolkit**.
- Built using React, Redux Toolkit, Tailwind CSS, and MongoDB for a scalable and efficient shopping experience.

URL Shortener & Analytics project [🔗](#)

2023 – 2024

- Developed a **dynamic URL shortener with authentication**, QR code generation, and analytics tracking, improving URL processing efficiency by 70%.
- Integrated real-time analytics**, including total clicks, device usage, user location insights, and interactive graphs (bar and pie charts), enhancing data visualization and user engagement.
- Built with ReactJS, Tailwind CSS, and Shadcn UI, leveraging Supabase for backend and Vercel for seamless deployment, ensuring high performance and scalability.
